

WATER IS OUR PROFESSION

Water treatment plants for drinking and
process water supply and water resources
protection – worldwide – locally adapted –
economically optimised

Water treatment plants for drinking and process water supply and water resources protection – worldwide – locally adapted – economically optimised

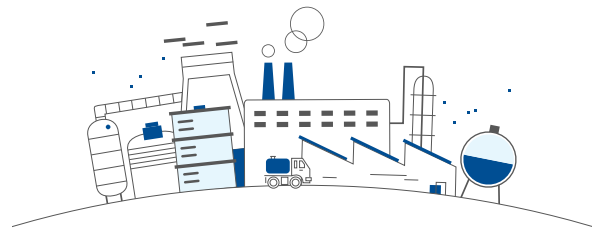

PWT is one of the leading contractors for the design, realization and operation & maintenance of treatment plants for wastewater, desalination of sea water, brackish water, ground water and drinking water.

We offer you economical, customised and manufacturer-independent solutions for municipal water supply and wastewater treatment as well as for process water treatment and water recycling for any industrial sector. From planning through implementation and digitalisation to operation – whether it is a new plant or a refurbishment of an existing one, PWT will always be there for you.

WATER TREATMENT FOR PUBLIC SECTOR

PWT offers flexible solutions for public clients as a main contractor for plant construction, realising technically qualified solutions for individual lots in the fields of plant construction, electrical engineering and digitalisation. We support you with the planning, tendering or implementation of your current project.

WATER TREATMENT FOR INDUSTRY

We deliver customised plants and individual services for a reliable and economical water treatment for industrial purposes. Whether it concerns a process, hydraulic, mechanical, piping, electrical and automation design everything is done in-house at PWT.

DRINKING WATER

Whether from surface water, ground water or seawater – PWT supplies you with the solution adapted to your needs, which comply with international and region-specific norms and standards.

PROCESSWATER

PWT offers you modern and energy optimised process water treatment plant. The focus will be on operational safety, economy and sustainability of the solution.

WASTEWATER

We draw on proved technologies, but also use innovative concepts, depending on the respective conditions and client's requirements. On request, we will be pleased to support you in preparing your application for the approval authority and accompany you through the approval procedure.

YOUR ADVANTAGES WITH PWT

**EXPERTS WITH
EXPERIENCE**

**RELIABILITY
AND SAFETY**

**CUSTOMIZED
SOLUTIONS**

**HIGH
QUALITY**
